Jakarta, Indonesia  
25-26 January 2013**

# FARMERS'DAY

## I. INTRODUCTION

For centuries farmers has developed agri-CULTURE with their SPECIFIC environmental condition

Even in a very hard condition, such as sand in coastal area of Jogjakarta, community develops agriculture suited for such environment.

Or, just 3 months after Merapi Eruption in 2010, farmers started cultivating their land

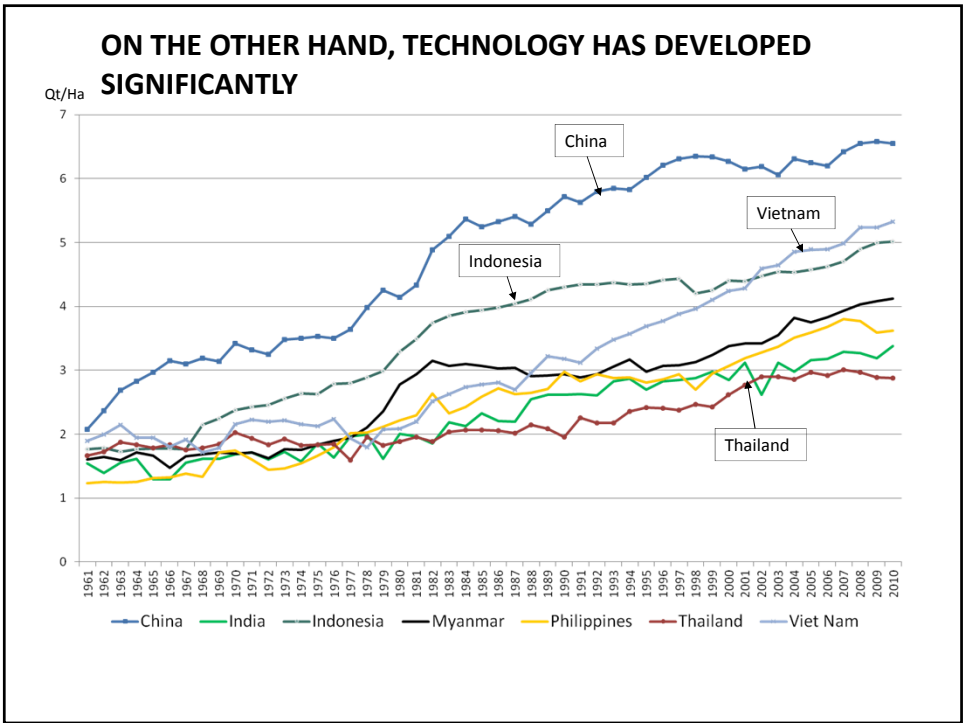

Farmers has also developed their capacity to do rice breeding.

- **Farmers and other communities has developed their own food security system**
- **Rice in this system can even be stocked for years to maintain community food security**

**GOALS:**

- ✓ To identify existing farmers' condition, their roles, problems, and possible solutions along the food supply chain
- ✓ To show capacity of farmers in pursuing their own community food security
- ✓ To show how technology can help farmers and community to enhance food security
- ✓ To seek possible means aligning farmers into the achievement of global food security

**TIME & PLACE:**

During SOM 3, 26-28 June 2013 in Medan

**TENTATIVE AGENDA**
