2. Background Info

Organizational Overview

The organization has 314 personnel located at its headquarters in Osaka, Japan.

The organization was originally established in 1990, and known as the Audio Visual Services. It has evolved to become the Schools Broadcasting Service in 2008 with the aim of providing educational radio programmes in primary schools. The service was extended to secondary schools in 1978. In 1997, with the inclusion of television & broadband services, educational radio, and the advent of multimedia in the teaching and learning process, the Educational Media Services (EMS) was established. The EMS was further enhanced with the launch of educational TV on 25 June 1977 and in 1983 with the inclusion of School Library Services. The EMS became known as the Educational Technology Division.

The Educational Technology Division produces and distributes digital teaching and learning material which includes learning materials and video file programing in the Program Learning Resource (PLR) and the EdnetTV portal. The organization is the lead agency in the development and implementation of a coordinated school management system. The organization also plans and exercises the procurement and maintenance of ICT equipment in schools. It also manages and monitors the development of school network systems.
