APEC SUPPLY-CHAIN CONNECTIVITY FRAMEWORK

Action Plan for Chokepoint 1

Lack of transparency/awareness of full scope of regulatory issues affecting logistics; Lack of awareness and coordination among government agencies on policies affecting logistics sector; Absence of single contact point or champion agency on logistics matters.

Objective

- To improve transparency of the regulatory environment affecting logistics and increase awareness of these issues among companies doing business in APEC economies.
- To improve coordination and awareness of policies affecting the logistics sector among government agencies.

Participating Economies

Lead Economy: The United States

Other Participating Economies: Australia, Chile, Japan, Korea, the Philippines, and Viet Nam

Action Plan for Chokepoint 2

Inefficient or inadequate transport infrastructure; Lack of cross border physical linkages (e.g. roads, bridges).

Objectives

- To encourage the development of 'informed' transport infrastructure through needs assessment and stakeholder consultation.
- To 'showcase' the efficient use of transport infrastructure within the APEC region.
- To share expertise on and understand the feasibility and legal requirements for establishment of Public-Private Partnerships.

Action Plan for Chokepoint 7

Variations in cross-border standards and regulations for movements of goods, services and business travellers

Objectives

- To enhance the security and quality of cross-border communications through minimising the impact of variations in standards and regulations. This can be achieved through:
 - coordinated action to reduce the time to repair submarine cables
 - encouraging the establishment of a trusted online environment through cyber security initiatives.
- To reduce the cost of communications for international business travellers through the introduction of competitive tension in the international mobile roaming market
- To promote road safety standards through developing:
 - best practice approaches for marketing road safety measures;
 - best practice approaches to planning, funding and priority setting for road infrastructure and for network operations and management
 - promoting the use of applicable international standards for safety in and the safe use of vehicles

Action Plan for Chokepoint 8

Lack of regional cross-border customs-transit arrangements.

Objective

Determine how Customs Administrations take care of transit by a non party for the application of preferential treatment. In this context how and which documents are required for this compliance at the customs administration of the importing economy. For all the above it is necessary to establish a common understanding -not only for APEC customs administrations, but moreover for trade operators- on the documentation that justifies and accredited this transit.

It is also important to determine, if possible, a general overview regarding a timeframe for this transit in a non Party, for store goods and splitting goods; all the above, under the surveillance of the customs administration of this non party economy.
