**Workshop on Improving Global Supply Chain
Resilience: Advancing the Seven APEC
Principles in Your Organization
Christchurch, New Zealand
26-28 March 2014**

Breakout Session 2: Strategic Overview

(Where do we want to be? / Where are we today?)

Ideas to consider:

1. What are the primary issues with the supply chain after a disaster?
2. How would a **more** resilient supply chain be different than the current one?
3. How much efficiency can be traded for resiliency?
4. Besides transportation, what elements do we need to think about? E.g. telephone, electricity.

Elements of Resilience:

Robustness, Redundancy, Resourcefulness, & Rapid Restoration
