We encourage the TPTWG to continue working with other stakeholders as well as other APEC fora and international organizations, like the International Civil Aviation Organization (ICAO), the International Labor Organization (ILO) and the International Maritime Organization (IMO) to improve transport safety, security and sustainability of operators, service providers and facilities.

Transport Minister Direction - TMM10

To fulfil this goal, we encourage economies to ensure that their respective aviation safety frameworks comply with the ICAO Standards. We acknowledge the work of the TPTWG in assisting economies with the implementation of ICAO standards on Performance Based Navigation (PBN) and training of civil aviation authority personnel, and we celebrate the progress that Malaysia and The Philippines have made in their implementation of PBN as a result.

We further encourage economies to utilize the latest security technology to better detect threats and facilitate efficiency so as to minimize security risks to transportation within the Asia-Pacific region.
