Better Food for a Better Future

Yongxiang Fan

China National Center for Food Safety Risk Assessment

Safe food for a healthy tomorrow.

-- Theme of World Food Safety Day 2021 campaign

Leaving No One Behind through sustainable, inclusive and resilient food systems for better production, better nutrition, a better environment, and a better life.

-- FAO strategy over the next decade

Codex, CCASIA, China and APEC

- ✓ By developing international food standards, which serve as a benchmark in WTO SPS/TBT Agreement, Codex Alimentarius Commission is safeguarding the health of consumers and ensuring fair practices in food trade.
- ✓ Hosting CCFA and CCPR, China is making her contribution to Codex, by guiding the Codex standards to be adopted by consensus, and promoting use of Codex standards.
- ✓ From 2020, China has become coordinator for CCASIA. This new role brings more responsibility for China, to promote the harmonization of food standards and positions in Codex committees for the region.
- ✓ Harmonization of food safety control measures, especially food safety standards, will be our goal in the next decades.

Thank you!
