

**Asia-Pacific
Economic Cooperation**

2021/SOM2/SCSC/FSCF/013

Agenda Item: 7.3

**Project Update - Strengthen and Expand Knowledge
in Sustainable Aquaculture Production Practices to
Reduce the Environmental Impact and Improve Food
Safety of the Food Products**

Purpose: Information

Submitted by: Chile

**8th Food Safety Cooperation Forum
28-29 May 2021**

Strengthen and Expand Knowledge in Sustainable Aquaculture Production Practices to Reduce the Environmental Impact and Improve Food Safety of the Food Products

Project Overseers

Ms. Constanza Vergara E. - Chilean Food Safety Agency (ACHIPIA)

Mr. Rolando Ibarra - Monterey Bay Aquarium SW

CHILE

8th FSCF, May 2021

Strengthen and Expand Knowledge in Sustainable Aquaculture Production Practices to reduce the environmental impact and improve food safety of the food products.
SCSC 02 2020A

Collaborative effort for:

Build capacity in good aquaculture practices under a one health approach, where human, animal and environmental health aspect are considered, leading to the **optimal use of antimicrobials**, using the model of sharing knowledge between APEC economies with different types of aquaculture production systems to optimize their management practices **with impact in animal health, sustainability and environment protection through the reduction and responsible use of antimicrobial**

APEC Project Design Amendment and Extension Form Submitted
New end date **AUGUST 2022**

THE WORLD BANK

Outputs:

- Survey for the Status of Aquaculture in APEC economies and publication.

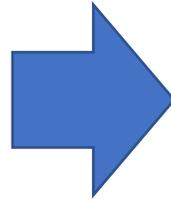

August-September 2021

- Workshops

W1: February 2022

W2: June 2022

- Aquaculture Production Self Evaluation Tool (APSET); and
- Good Management Aquaculture Practice Handbook.
- Finalized *July 2022*

SUPPORT THE
OUTCOMES AND
OBJECTIVES
BEING ACHIEVED

THE WORLD BANK

Strengthen and Expand Knowledge in Sustainable Aquaculture Production Practices to Reduce the Environmental Impact and Improve Food Safety of the Food Products
