# Supply Chain Framework Action Plan III 2022-2026

Key Findings from the Survey for Private Sector

# Introduction

## SCFAP III

- Phase Three of the SCFAP (2022 – 2026) to identify and address present supply chain chokepoints, with the overarching goal of building secure, reliable, sustainable and open supply chains to create a predictable, competitive and digitally-interconnected Asia-Pacific region for all.

## Objective of the Survey

- Understand firms' operating environments, specifically in understanding the supply chain challenges post-pandemic.
- Ensure that the SCFAP III framework is fit-for-purpose and addresses the needs of the private sectors.

## Synopsis of Findings

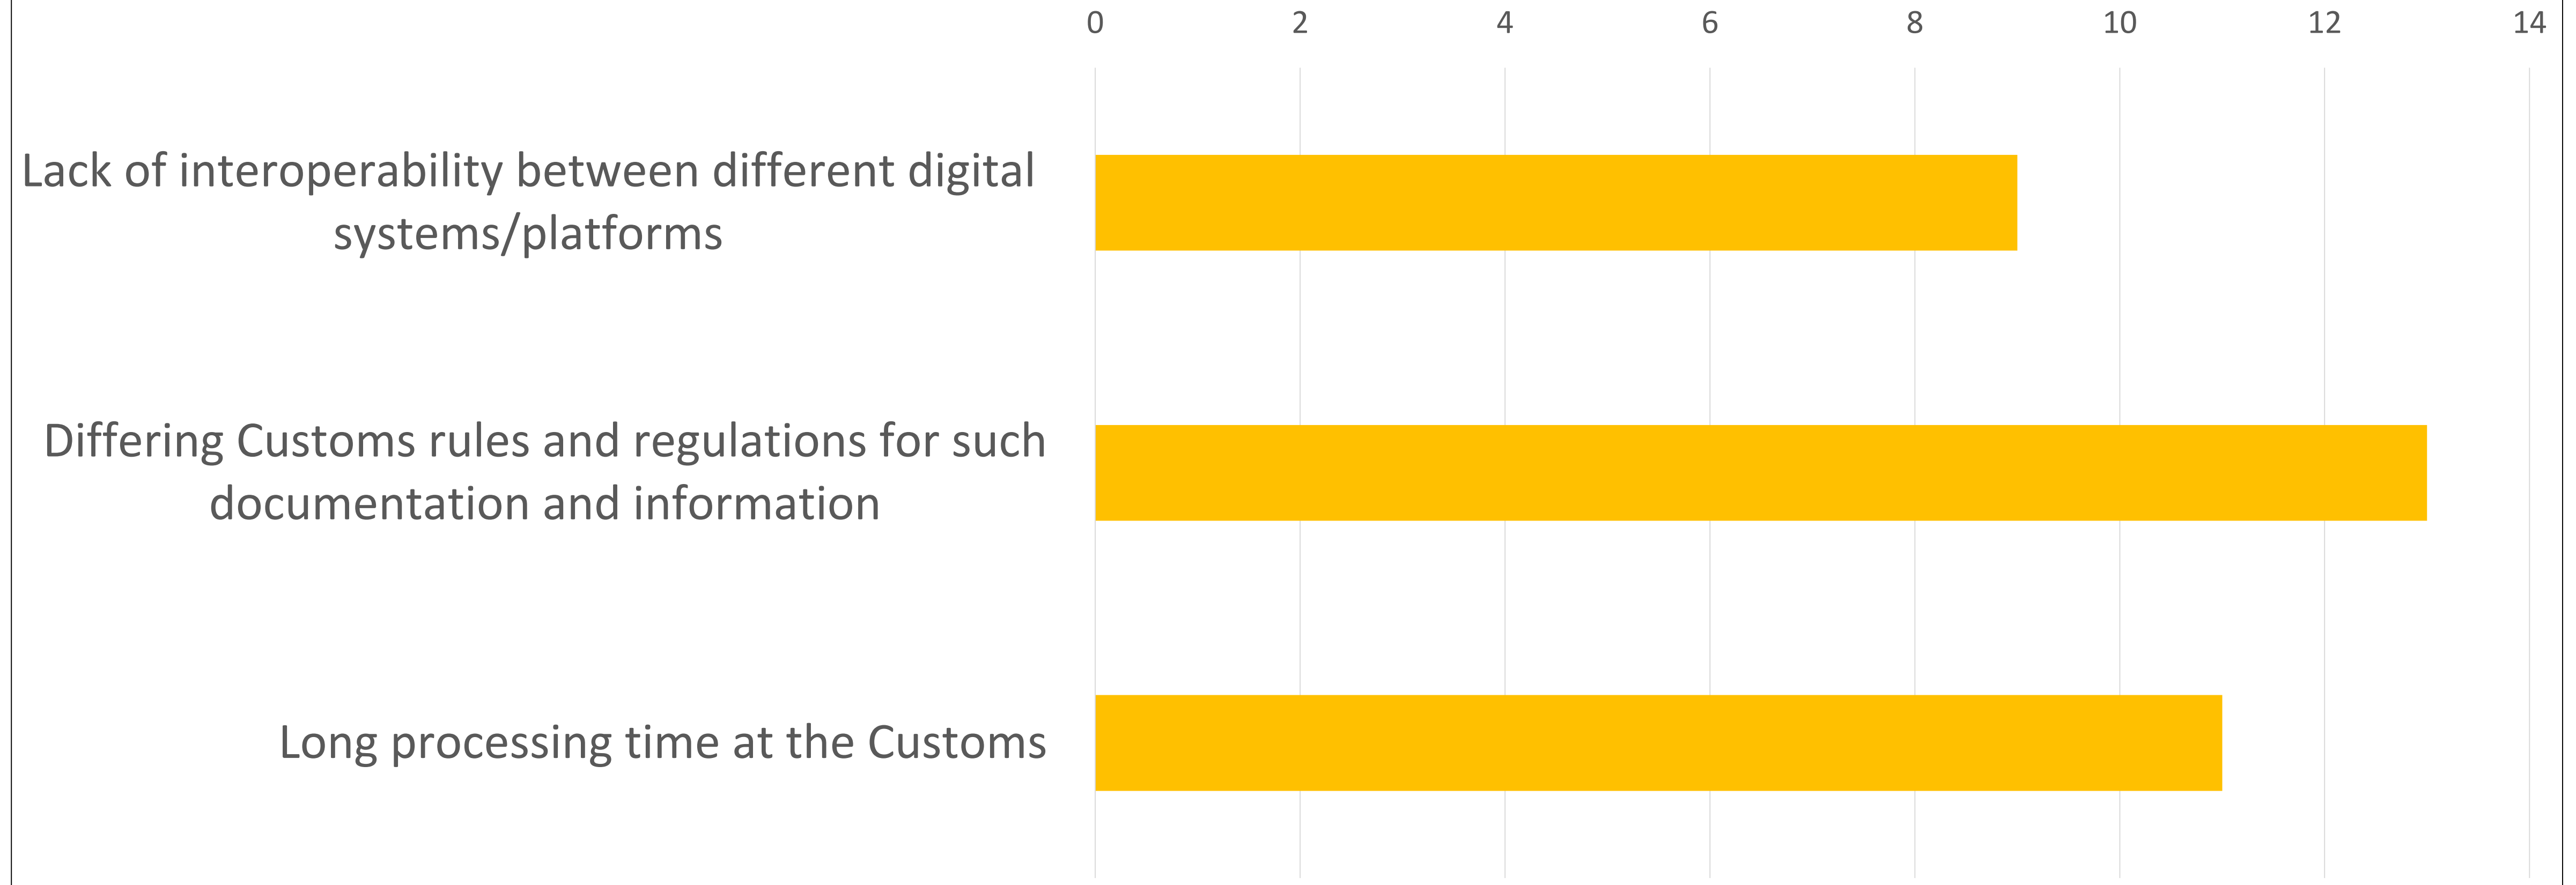

- Largely in line with the 5 chokepoints identified in the SCFAP III framework.

## Digitalization of border procedures:

Inefficiencies encountered when utilizing digital platforms for trade documentation.

### Digitalization of Border Procedures and Trade Documentation Exchanges:

What are some inefficiencies encountered when utilizing digital platforms/systems to submit and/or exchange trade documentation and information with government trade-related border agencies? Please select all that apply.

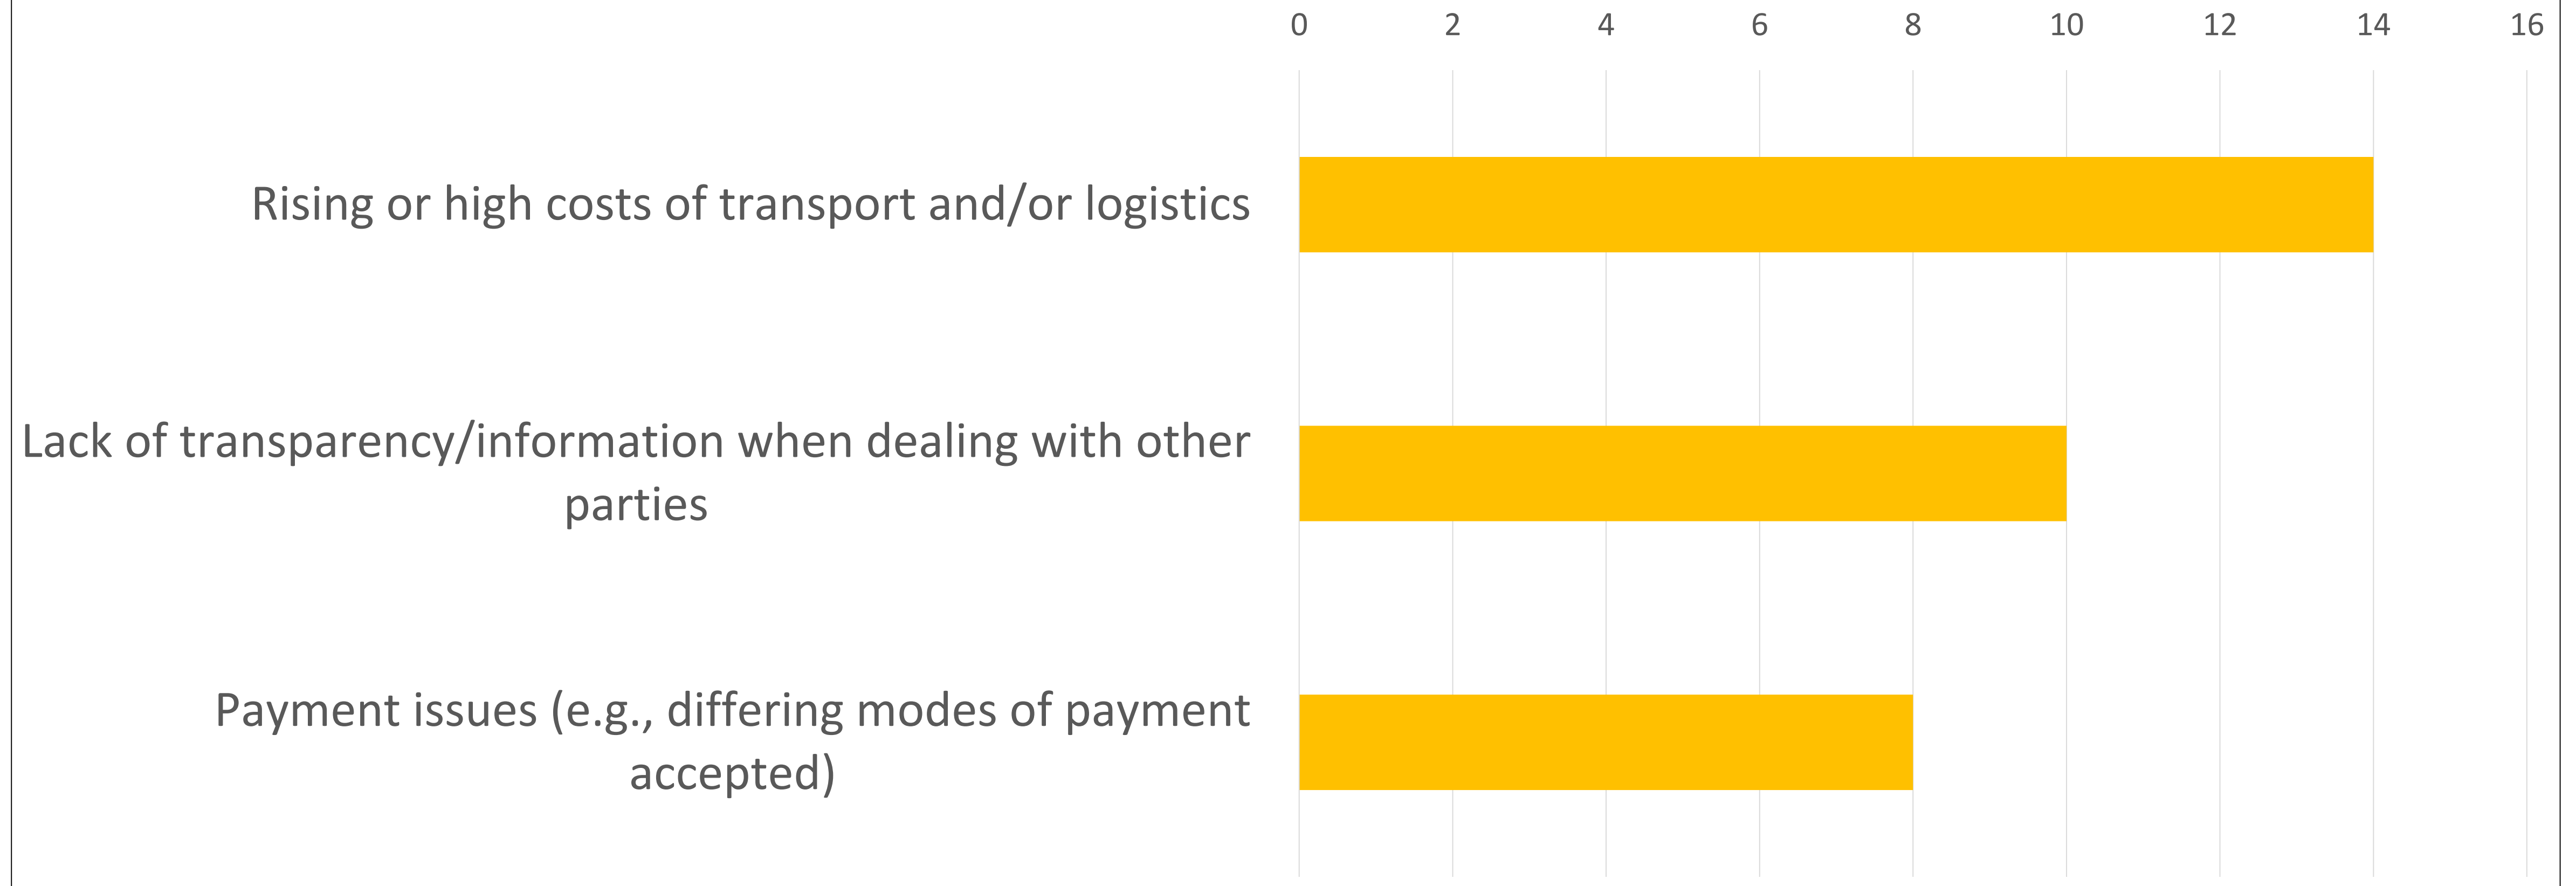

# Infrastructure development to support robust multi-modal connectivity and logistics network:

## Challenges in the logistics operations of companies.

### Infrastructure Development to Support Robust Multi-modal Connectivity and Logistics Networks:

What are the main challenges, if any, that your firm faces in logistics operations? Please select all that apply.

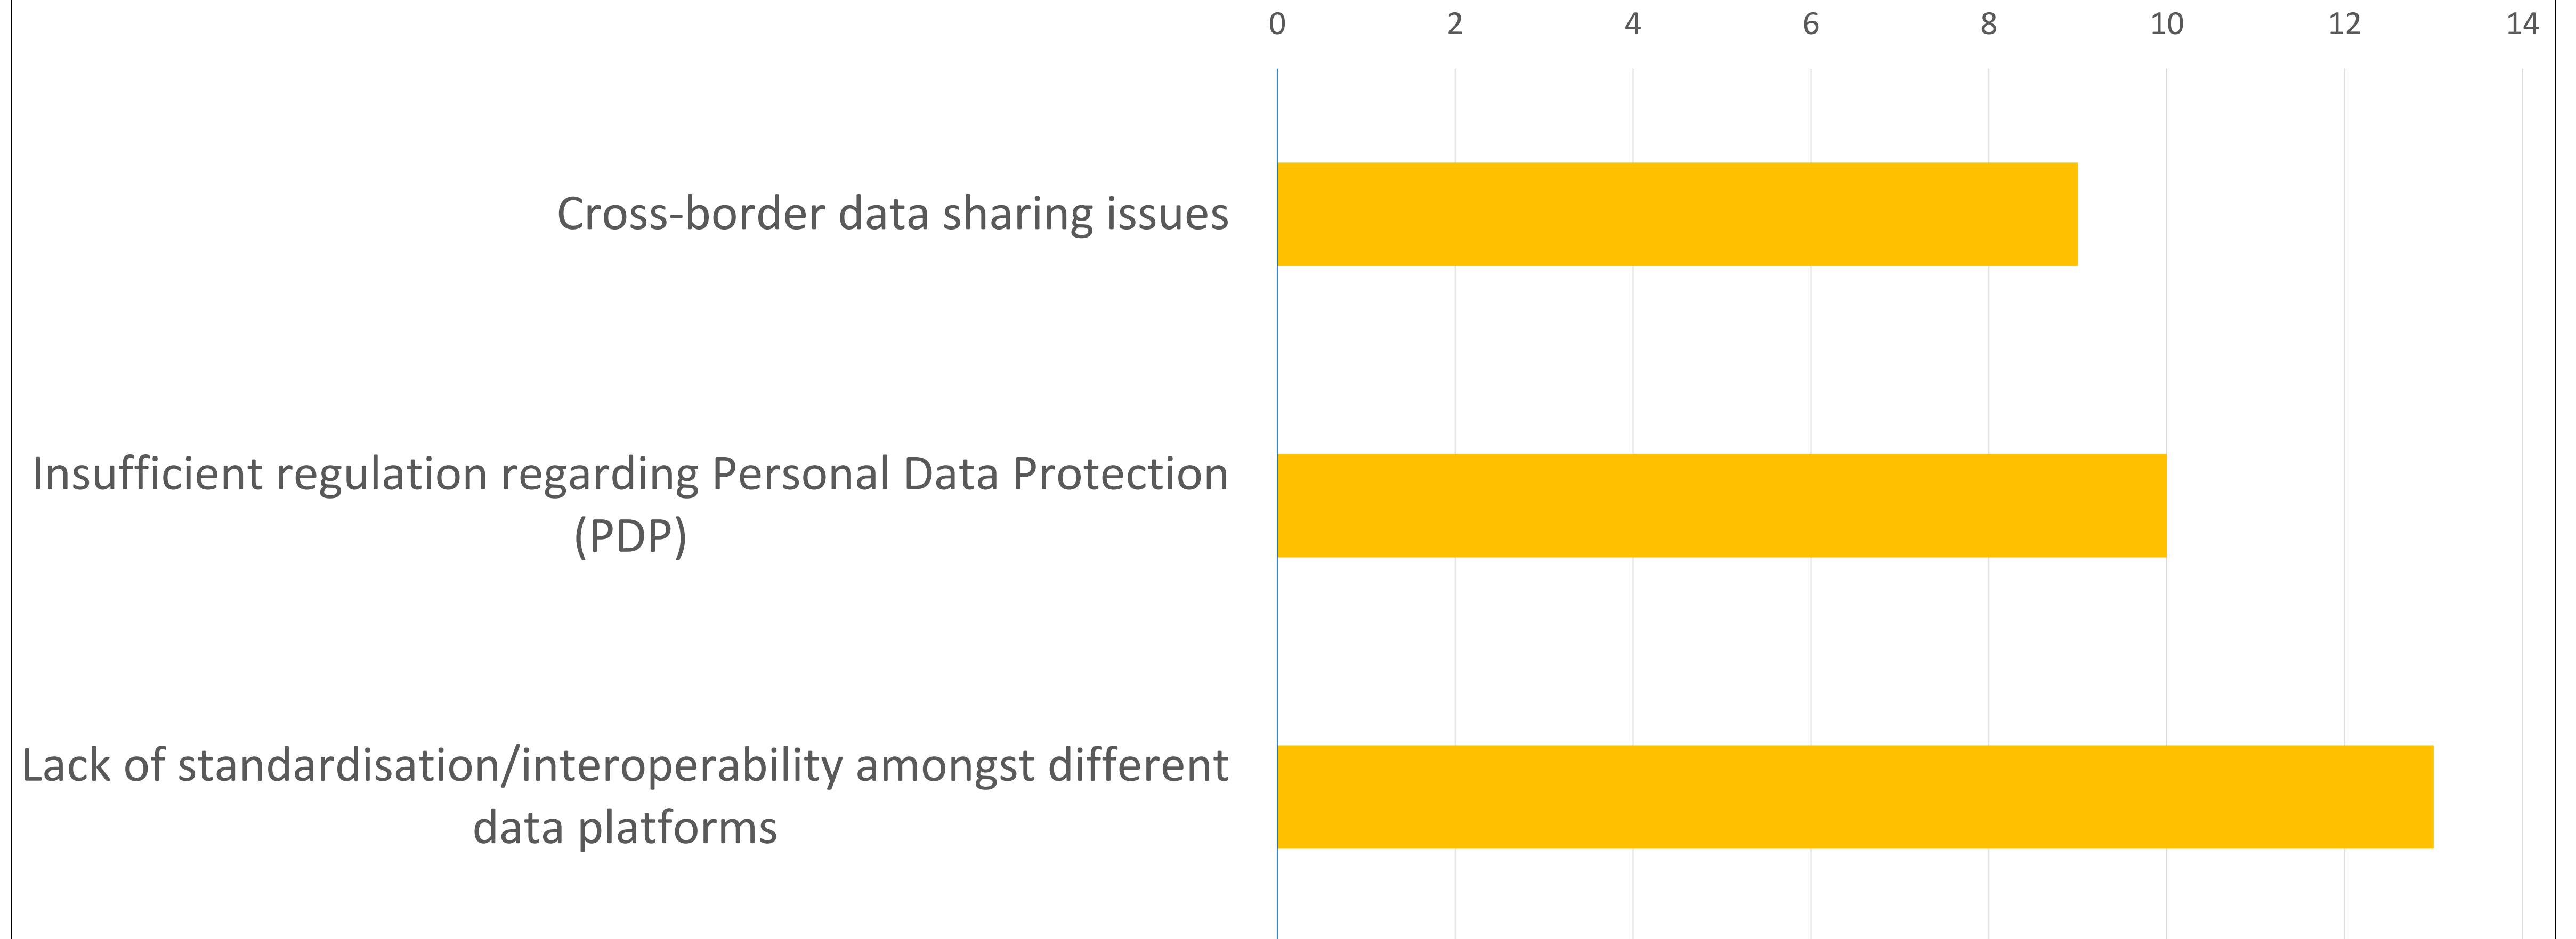

# Data flows and cross-border payments to support increasingly digitalised supply chains:

## Challenges in data flows for firm's operations.

### Data Flows and Cross-Border Payments to Support Increasingly Digitalised Supply Chains:

What issues do you face, if any, regarding cross-border data flows that concern your firm's operations? Please select all that apply.

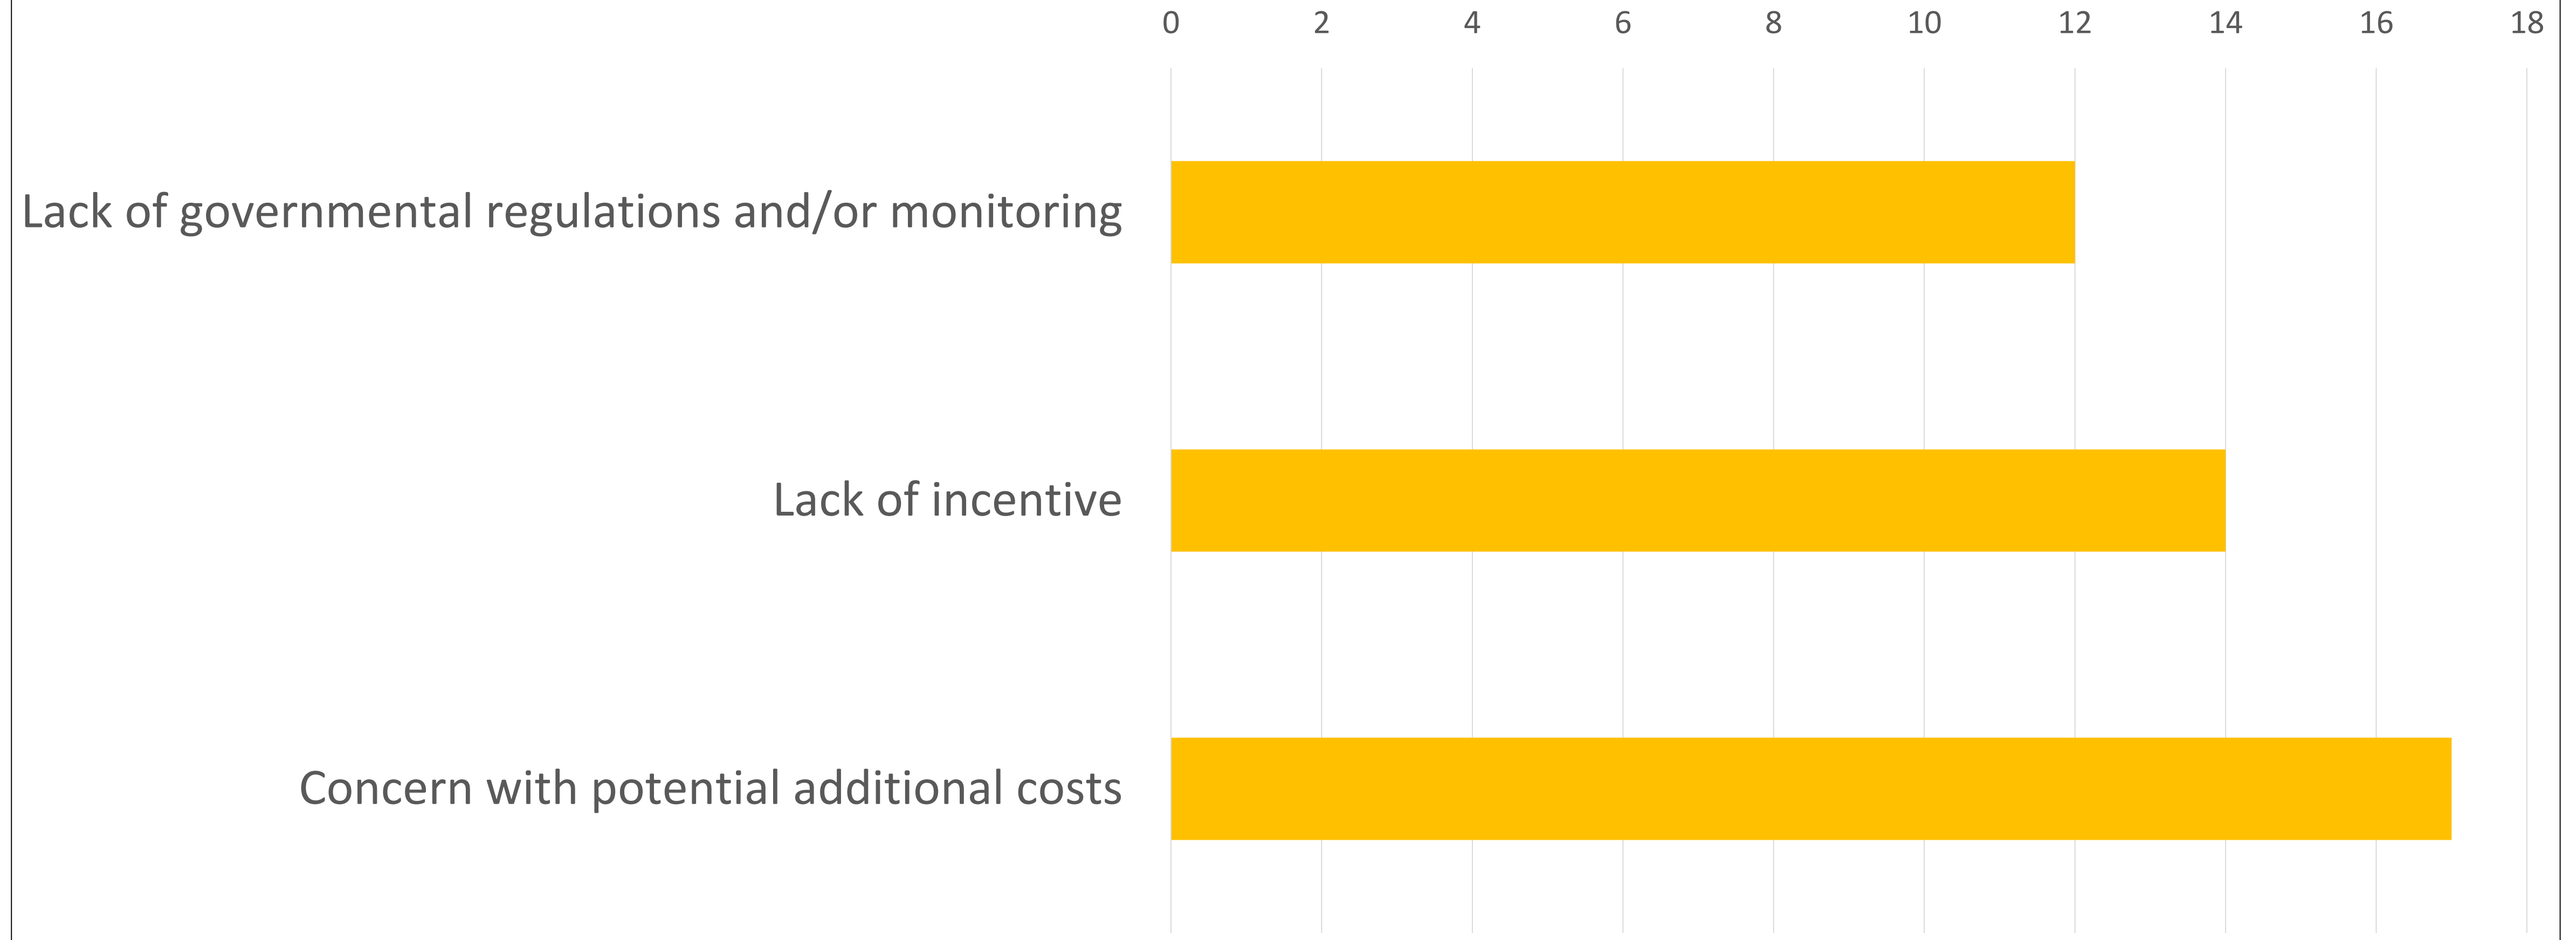

## Green supply chain management practices:

### Challenges with incorporating sustainability practices.

#### Green Supply Chain Management Practices:

In your opinion, what are some of the challenges inhibiting firms from incorporating environmental sustainability practices within operations? Please select all that apply.

# Access and integration into global supply chains:

## Challenges with accessing global supply chains.

### Access and Integration into Global Supply Chains:

What are the main challenges your firm has experienced in accessing global supply chains?  
Please select all that apply.
