Japan's power mix by sources

(TWh)

Oil Coal LNG Nuclear Hydro Renewables

GX (Green Transformation) as an enabler

Basic Policy for GX (2023)

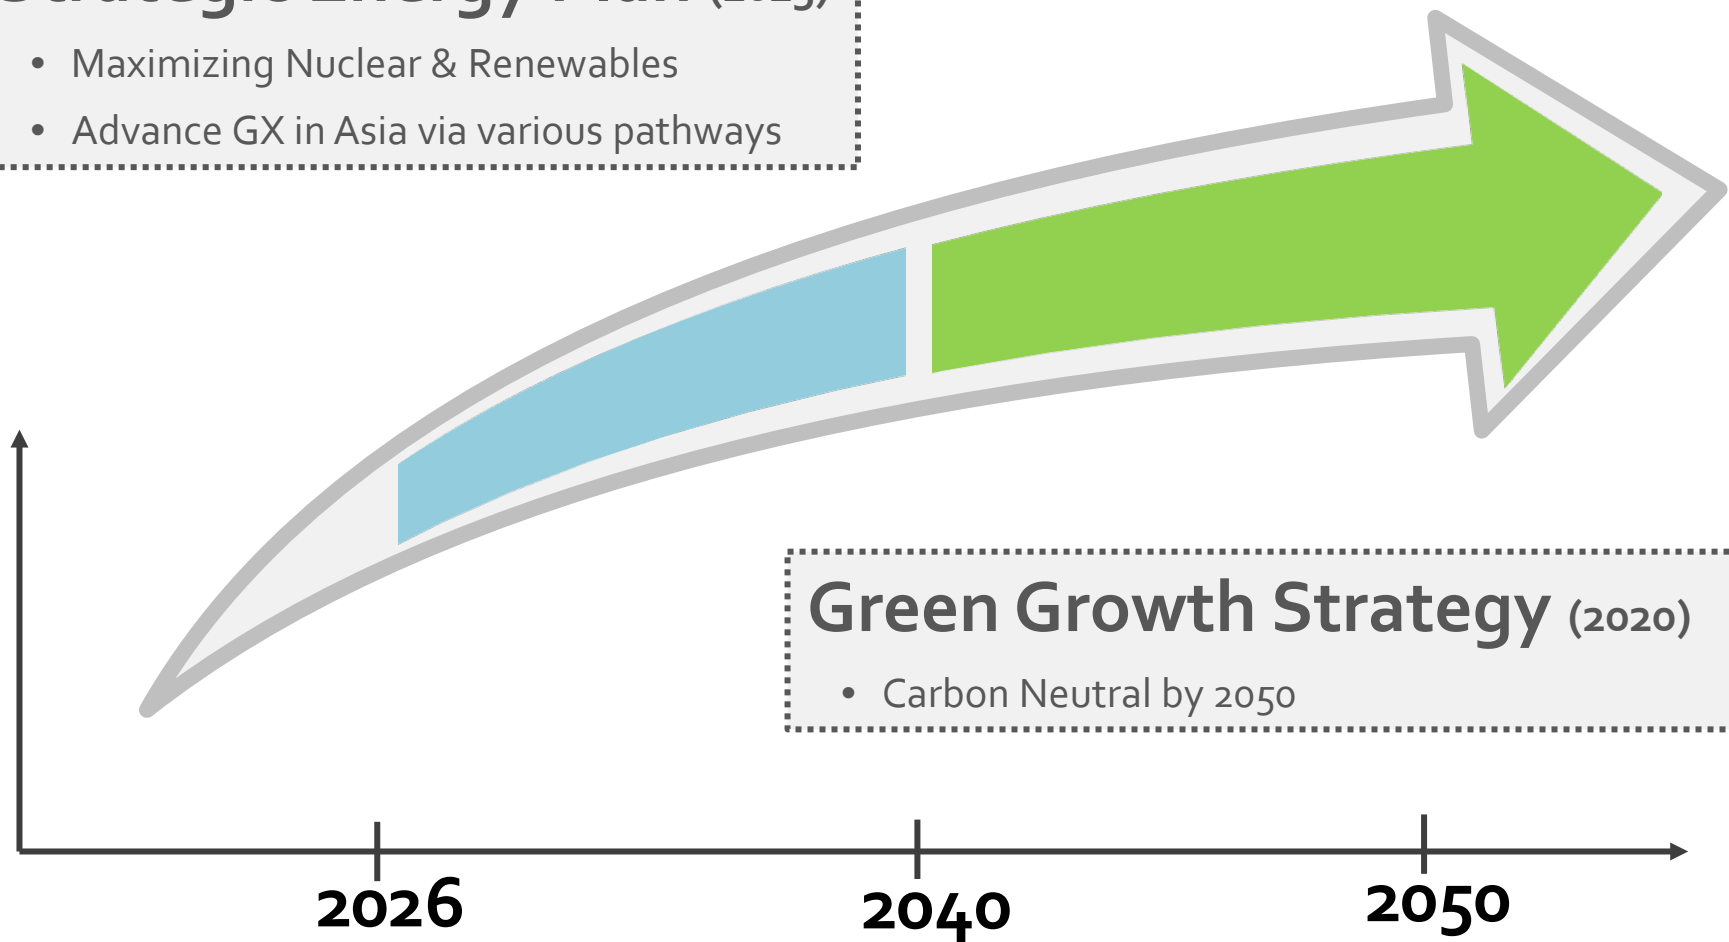

- 150T JPY investments via GX bonds

Strategic Energy Plan (2025)

- Maximizing Nuclear & Renewables
- Advance GX in Asia via various pathways

POWERX GX (Aug 2026)

- Diversify fuel supplies for energy security
- Boost energy transition & supply capacity

POWERR Asia (Partnership on Wide Energy & Resources Resilience Asia)

- ✓ Japan to provide \$10B in financial support to Asian economies facing fuel supply shortages and supply-chain disruptions.

【Emergency Response】

Supply procurement and
supply-chain maintenance

① Financial support for local companies

- Credit provision/enhancement to procure alternative crude oil & petro-products
- Financing for companies in Asia that are part of Japan's supply-chain.

② Fiscal support for Asian economies

- Loans to partner economies affected by disruptions in Japan-lined supply chains.

③ Collaboration with intl' organizations

- Coordination with ADB financial support (support for supply-chain companies, etc.)
- IEA analysis & suggestions (visualizing oil flows after coordinated releases)

【Structural Response】

Asian Economic and
Energy Resilience Initiative

① Strengthening energy supply systems

- Support for building crude oil stockpiling and release systems
- Support for the construction and use of infrastructure such as storage tanks

② Diversifying energy sources

- LNG, biofuels, next-gen solar, SMRs, critical minerals

③ Upgrading industry

- Investment and cooperation in energy efficiency
- Improving manufacturing efficiency through the introduction of new technologies

Japan is ready to walk with you

- ✓ Energy policy takes various pathways.
- ✓ Japan is ready to provide tailored support for each economy's unique circumstances.
- ✓ "POWER Asia" is a key driving force.
- ✓ Japan has extensive experience in energy security, with valuable lessons learned.
- ✓ Why not walk with Japan?
